#### Defects Fixed (2):

**ID:** DCSG01271785  
**Headline:** system time sync'up fails for expander with storcli command  
**Description Of Change:** Timestamp is now being converted to milliseconds and is then populated as part of the maintenance out command with set timestamp opcode.  
**Issue Description:** Timestamp was being sent in seconds instead of milliseconds because of which we see the time is being set to Jan 20 1970.  
**Steps To Reproduce:** Issue set timestamp on the enclosures connected.

**ID:** DCSG01275981  
**Headline:** CLI crashes when setting timestamp on all the enclosures  
**Description Of Change:** Made sure that the timestamp being fed to the time API is provided in seconds and not in milliseconds.  
**Issue Description:** When CLI issues set timestamp on all the enclosures, We are converting the time to milliseconds and this value is fed to the time API which is expecting time in seconds and not in milliseconds.  
**Steps To Reproduce:** Run set time=systemtime command on all enclosures using /eall command.

## Enhancements Implemented (2):

ID: DCSG01214261

**Headline:** Time-sync between Host-Utilities and all the Expanders in the topology

**Description Of Change:** Added new command to set the timestamp on the enclosure.

Command : storcli64 /cx/ex set time=systemtime

The above command will send maintenance out command(0xA4) with report timestamp service action 0xF. Tool will set the system time. This command is not supported in EFI platform and only in host platforms because in EFI platform the system time cannot be read as the time zone is always GMT.
